

Spiegel & McDiarmid has extensive experience with the numerous statutes that govern the supply and quality of water for municipal, industrial and agricultural use, as well as the treatment and management of wastewater. The firm serves as counsel to municipalities, public power entities, airports, Native American organizations, states, and irrigation districts on complex water-related matters of all kinds, including:

- Hydroelectric
- Water Rights and Privatization
- Water Quality
- Endangered Species Act
- Wetlands
- Wastewater

Spiegel & McDiarmid can assist clients with a broad range of water management issues, such as:

- Lobbying for rural and municipal system issues
- Clean Water Act compliance and policy work
- Total Maximum Daily Load (TMDL) issues
- Storm water
- Alternate approaches using land conservation
- Brownfields redevelopment
- Funding for water infrastructure, sewer, and drinking water clean-up

- Terms of Sale of wholesale water and power to public water systems and cities
- Airport water drainage
- Other areas of federal law impacting the use and development of water and other natural resources
